

UPSKILLING

Data Science Immersive: Completing self-taught data science skills including explored statistical concepts, linear algebra, multivariate calculus, data analysis with Python, and Python-based immersive focused on machine learning.

Stanford Online – Introduction to Statistics: Explored statistical thinking concepts that are essential components of data science, forming the foundation for machine learning models, and are essential for learning from data and communicating insights. [Certificate](#)

Imperial College London – Mathematics for Machine Learning: Linear Algebra: Application of mapping vectors and matrices, including projections and transformations by basis vectors in coordinate systems, and eigen-problems. [Certificate](#)

Imperial College London – Mathematics for Machine Learning: Multivariate Calculus: Application of multivariate calculus in calculating gradients, find the minima or maxima, and regression. [Certificate](#)

DeepLearning.AI – Supervised Machine Learning: Regression and Classification: Built and trained supervised machine learning models for prediction and binary classification tasks, including linear regression and logistic regression. [Certificate](#)

IBM – Exploratory Data Analysis for Machine Learning: Learned techniques to retrieve data, clean it, apply feature engineering, and have it ready for preliminary analysis and hypothesis testing. [Certificate](#)

IBM Data Science Professional Certificate: Completed most of the IBM Data Science Certifications, learned core data science skills and machine learning, demonstrated hands-on skills.

Some Highlight Certifications:

- **IBM – Machine Learning with Python (with Honors)** – [Certificate](#) | [Badge](#)
- **IBM – Databases and SQL for Data Science with Python (with Honors)** – [Certificate](#) | [Badge](#)
 - Analyzed data within a database using SQL and Python. - Composed more powerful queries with advanced SQL techniques like views, transactions, stored procedures, and joins.
- **IBM – Data Analysis with Python** – [Certificate](#) | [Badge](#)
- **IBM – Python for Data Science, AI & Development** – [Certificate](#) | [Badge](#)

AWS Innovate – Data and AI/ML Edition: Attended AWS Innovate Online Conference, building machine learning solution with AWS, such Amazon SageMaker, Amazon Polly, and more. [Certificate](#)

Google Data Analytics Professional Certificate: Obtained the Google Data Analytics Certificate. Demonstrated hands-on experience with core data analytics skills including: SQL, Tableau, Spreadsheets, and R. [Certificate](#)
